- Integrated storage compartment

## MH11BFLEX - Buddy FLEX™

### Buddy FLEX Features:

Updated design featuring optimized wind barrier and pilot shield for maximum protection when using outdoors\*

Survey groups of existing Buddy consumers and consumers with no experience with our products, the ability for the unit to operate outdoors was consistently at the top of user requests. Therefore, as well as being the safest indoor heater available today, our development team spent hours designing the shape of the wind barrier and pilot shield to optimize for outdoor use (tailgating, sporting events, hunting & fishing)

All new fiber mesh burner; Lighter weight, more durable and more flexible for any weather conditions

Pilot Guard and Wind Barrier

## MH11BFLEX - Buddy FLEX™

Storage  
Compartment
